

Vector Inspector Sample Kit

Name: _____ Grade: _____

School: _____ Teacher: _____

Ready for your mission?

Watch Video

<https://bit.ly/VIPparents>

- Collect a little water (and any baby mosquitoes that might be living there) from each item with trapped water you find in your yard
- Use your dropper to collect some of the water and squirt it into your cup. Repeat for each item holding water.
- Once you have found all the places holding water, snap the lid on your cup with your water samples. You will turn in the water cup with the signed checklist.
- Dump the rest of the water in the containers out on the ground and put the items away to keep mosquitoes out.

Can't find any water? Great! Have an adult sign your checklist and turn it in!

CHECKLIST: PLACES TO LOOK for TRAPPED WATER

☐

Pools and hot tubs

☐
